BUSINESS MODEL CANVAS · 2024–2026 ROADMAP

KEY PARTNERS

Who We Work With

- **Healthcare Providers** — Clinics, hospitals, and diabetologists for clinical pilots and endorsements
- **Regulatory Bodies** — DRAP (Pakistan), FDA (US), CE (Europe) for device approvals
- **Tech Developers** — Hardware engineers (spectroscopy sensors) and mobile app dev team
- **Insurance Providers** — Negotiating reimbursement coverage for device cost
- **Innovation Grants** — Ignite, HITEC for non-dilutive seed funding
- **Universities** — Local engineering institutions for affordable R&D collaboration

KEY ASSUMPTION
Healthcare providers will endorse and integrate the product into their practices.

→ LOW-COST TEST
Pilot with one local clinic; gather structured provider feedback.

KEY ACTIVITIES

What We Do

- **R&D** — Spectroscopy-based glucose sensor development
- **Clinical Trials** — Accuracy validation, regulatory submission
- **App Development** — Real-time sync, trend alerts, EHR integration
- **Regulatory Compliance** — DRAP, FDA, CE pathways

KEY ASSUMPTION
Device will pass trials without significant delays.

→ LOW-COST TEST
Small-scale trial (n=20) to test accuracy & regulatory feedback early.

KEY RESOURCES

What We Need

- **R&D Team** — Sensor engineers + data scientists
- **Manufacturing Partners** — Local + global hardware sourcing
- **Software Team** — iOS/Android app + cloud infra
- **Regulatory Experts** — DRAP/FDA specialists
- **Data Security Infra** — HIPAA/GDPR compliant systems

→ LOW-COST TEST
Get 3 competing quotes from manufacturers before committing.

CORE VALUE

VALUE PROPOSITION

Pain-Free. Affordable. Continuous Glucose Intelligence.

- **Non-invasive monitoring** via near-infrared spectroscopy — no finger pricks, ever.
- **Real-time mobile dashboard** with trends, alerts, and AI-driven insights.
- **Affordable at PKR 5,000** — designed specifically for emerging market purchasing power.
- **EHR & provider integration** for seamless remote monitoring by clinicians.
- **Clinically validated** — FDA/CE/DRAP certified before market launch.

No finger pricks · Real-time alerts · PKR 5,000 device · AI insights · Emerging markets

KEY ASSUMPTION
Market will accept the device based on accuracy and affordability.

→ LOW-COST TEST
Free trials to targeted diabetic patients; measure adoption & willingness to pay.

CUSTOMER RELATIONSHIPS

How We Connect

- **Self-service app** for daily monitoring
- **Online support** via chat and helpdesk
- **Regular app updates** to improve engagement
- **Doctor endorsement** pathway for trust building

KEY ASSUMPTION
Users prefer self-service over frequent direct provider interaction.

→ LOW-COST TEST
Track app usage patterns; survey to test self-service adequacy.

CHANNELS

How We Reach Them

- **Online direct sales** via GluWise website
- **Healthcare provider partnerships** — clinic prescriptions
- **Social media & influencer** marketing (health accounts)
- **Insurance channels** — reimbursement-driven adoption

KEY ASSUMPTION
Digital marketing + provider partnerships drive user acquisition effectively.

→ LOW-COST TEST
Small digital campaign targeting diabetics; monitor conversion rates.

CUSTOMER SEGMENTS

Who We Serve

- **Primary:** Diabetic patients in Pakistan and emerging markets — underserved, price-sensitive, lacking access to continuous monitoring.
- **Elderly population** with Type 2 diabetes and low tech confidence.
- **Healthcare providers** (clinicians, nurses, diabetologists) needing remote monitoring tools.
- **Low-income communities** in high-prevalence regions with limited clinic access.

KEY ASSUMPTION
Primary segment: diabetic patients in emerging markets lacking traditional solutions.

→ LOW-COST TEST
5-interview study to validate pain points & willingness to adopt.

COST STRUCTURE

What It Costs to Build & Scale

PHASE 1 · SEED · 0–12MO
PKR 1.5M
≈ USD 5,500
Prototype R&D · DRAP regulatory setup · Legal structure · Early team · Initial device testing

PHASE 2 · STARTUP · 12–24MO
PKR 2.0M
≈ USD 7,500
Batch production (500–1,000 units) · App development · Digital marketing · Healthcare pilots

PHASE 3 · GROWTH · 24–36MO
PKR 5.0M
≈ USD 18,500
Scale production (5,000–10,000 units) · City expansion · Support systems · Team build-out · Insurance tie-ups

Bootstrapping (Seed) · Crowdfunding (Startup) · Angel Investors · Ignite / HITEC Grants · Strategic Partnerships (Growth)

REVENUE STREAMS

How We Make Money

Direct Device Sales
One-time hardware purchase for each patient.
PKR 5,000 / unit

App Subscription
Premium features: continuous monitoring, AI insights, data export.
Monthly SaaS

Insurance Reimbursement
Post-FDA/CE validation, payers cover device cost for covered members.
Partnership Model

Provider Licensing
Clinics pay for remote patient monitoring dashboard access & analytics.
B2B Licence

GluWise Health Pvt. Ltd. · Private Limited Company Structure · Scalable Social Startup
Registered in Pakistan · Target Market: PKR 5,000 device · Scale trigger: 500 daily active users
